

Our industry exclusive Green Shield Services™ program is customized to offer both the very best in collection and resource recovery services and confidence through best practices for a sustainable environment. Each of these products and services were specifically designed to meet the strict performance and environmental protection guidelines established by the Green Shield Services program.

USED OIL RECYCLING

Services include the pick up, transportation, and processing of used mineral-based oils of all types. We'll work with you to set up a service schedule that meets your specific needs.

USED OIL FILTER RECYCLING

Services include the pick up, transportation, and processing of hard and soft hydrocarbon filters, greases, and absorbents across multiple industries. Both individual drum and bulk container-based programs are available.

ANTIFREEZE PRODUCTS AND SERVICES

Two-part program. First component includes the pick up, transportation, and processing of used antifreeze. The second component includes the sale of remanufactured antifreeze/coolant product. Both Conventional and Extended Life formulations are available to save you money without sacrificing quality.

COMMERCIAL AND INDUSTRIAL WASTEWATER SERVICES

Everything from Oil/Water Separators and Sand Traps to Oily Manufacturing Water, we will pick up, transport, and process your materials for maximum reutilization and minimum liability.

PARTS WASHING SERVICES AND SOLVENT RECYCLING

Whether it's a traditional solvent tank, an upright cabinet "dishwasher" or aqueous-based unit, Thermo Fluids can assist you in developing a program that makes sense for your operation.

LOCATION SPECIFIC PRODUCTS AND SERVICES

Based upon geographical and other marketplace dynamics, Thermo Fluids has certain market specific product and service offerings available to meet your needs. Some examples are Absorbent Material, Industrial Waste and Emergency Response Services. Your local Account Manager will provide you with the details of these offerings.

Your call will be automatically routed to the nearest dispatch location

THE ENVIRONMENTAL SERVICES LEADER

Thermo Fluids operates service and processing facilities throughout the western United States. Each plant is fully permitted to conduct business in accordance with all governing regulatory requirements. We serve the resource recovery and environmental compliance needs of hundreds of customers every day and would be happy to provide excellent references upon request.

ANTIFREEZE PRODUCTS

Our high quality Antifreeze Products, available in both Conventional and Extended-Life formulations, are manufactured from used glycols at our state-of-the-art plant in Nevada. This industry leading program has many benefits including:

- Substantial money savings
- Superior performance characteristics
- Recycling at its best
- Environmentally responsible

GREEN SHIELD PARTNERS™ PROGRAM

Our commitment to environmentally sustainable business practices goes beyond our internal processes and objectives. We've developed a program to assist and be assisted by our customers in a partnership for greater education and communication of sound environmental stewardship. Each of our customers automatically participate in this program and make a commitment to sustainability and protection by simply choosing Thermo Fluids.

INSURANCE AND INDEMNIFICATION

Because environmental liability is probably the most important issue you face as a waste generator, Thermo Fluids provides liability protection in the form of indemnification and full coverage insurance for our services. We provide a written guarantee that your materials will be properly handled in strict accordance with local, state, and federal regulations.

COMPLIANCE ASSISTANCE PROGRAM

As part of the Green Shield Partners Program, Thermo Fluids will also be there to assist you with the Regulatory Compliance process. This includes a periodic walk through of your facility by trained personnel who'll make recommendations if needed. Additionally and should the need arise, scanned copies of your last 3 years of service documentation are kept on file and made available electronically for fast access.

Perform Energy Products describes our industry leading Reprocessed Fuel Oils program. When it comes to evaluating a product, performance is everything. Our products are developed for one purpose... to perform and perform well.
